

Poster Session B (Saturday 30th September)

Id	Title	Poster Board Number	Time
219	Delirium Snapshot - Inpatient Rates And Demographics Of Delirium In An Irish University Teaching Hospital	1	1.30pm
312	Paying Attention to Daily Delirium Screening in an Acute Hospital Setting, An Audit of Implementation on Orthopaedic Wards	1	1.30pm
292	Frailty At The Front Door Team Compliance With The 4Ms Of The International Healthcare Improvement Age-Friendly Healthcare System	1	1.30pm
33	Audit: Delirium Recognition on an Acute Medical Ward	1	1.30pm
129	Can we improve the patient experience for frail, older persons admitted with delirium?	1	1.30pm
229	OPTI-3S (Criteria for Optimising Medicines by Stopping, Stepping Down, or Switching to Safer Alternatives): Consensus Validation via a Delphi Method	1	1.30pm
230	Inter-rater Reliability Assessment of OPTI-3S (Criteria for Optimising Medicines by Stopping, Stepping Down, or Switching to Safer Alternatives)	1	1.30pm
254	The Use of Delirium Screening Tools During Acute Inpatient Hospital Admissions - A Local Audit	1	1.30pm
61	Dietetics addition to a Frailty Intervention Team ,À An Analysis	1	1.30pm
195	Enhancing The Care Of The Older Adult With Delirium In The Emergency Department: The Implementation Of Non Pharmacological Strategies .	1	1.30pm
290	Documenting Medication-Related Needs Of Older Persons Assessed By Frailty At The Front Door Teams	1	1.30pm
98	Bone Health: Managed Correctly? A Clinical Audit	2	1.30pm
85	I DO, I CARE: Implementing Delirium screening for Older people to Improve Care, Awareness and Recognition in the Emergency department.	2	1.30pm
210	Screening For Frailty In The Acute Medical Admissions Unit And Examining Referral Patterns to Physiotherapy	2	1.30pm
235	A CLINICAL AUDIT OF DETECTION AND MANAGEMENT OF SARCOPENIA IN A MIXED STROKE WARD IN AN ACADEMIC TEACHING HOSPITAL	2	1.30pm
184	Paying Attention to the Feasibility of Daily Delirium Screening in an Acute Hospital Setting	2	1.30pm
246	Feasibility Of A Delirium Intervention Pathway By A Frailty At The Front Door Team	2	1.30pm
212	Sarcopenia Case Finding: Impact of Body Mass Index on Calf Circumference Measure	2	1.30pm

41	Prevalence of delirium among older patients attending a Frailty service in an Emergency Department	2	1.30pm
42	Resolution of delirium upon discharge & mortality rates among frail older persons attending an Emergency Department Frailty Service	2	1.30pm
193	A REVIEW OF THE BED RAIL USE AND USE OF A BED RAIL RISK ASSESSMENT TOOL IN A REHABILITATION UNIT	2	1.30pm
81	Does Premorbid Frailty Status affect Rehabilitation Outcome?	2	1.30pm
40	Reported hydration intake of older patients in an Emergency Department	3	1.30pm
63	Introduction of an Older Persons Comfort Cart to an Emergency Department	3	1.30pm
75	The Covid-19 Pandemic And Social Frailty: An Evaluation Of Occupational Therapy Practice In A Day Hospital	3	1.30pm
48	The Collaboration Of Oncology Clinical Nurse Specialists and Public Health Nurses In Comprehensive Geriatric Assessments In Patients Undergoing Cancer Treatment	3	1.30pm
6	Exploring professional-robot interactions in care settings: A case of adopting an Irish air-disinfection device in a nursing home in Japan	3	1.30pm
7	Designing and testing an integrated community care model with a remote home monitoring-alert device: a pilot study in Japan	3	1.30pm
94	Polypharmacy in Older Adults: The Role of the Advanced Nurse Practitioner	3	1.30pm
22	Point Prevalence Study of Therapeutic Anticoagulation Dosage based on Renal Function in an Older Population	3	1.30pm
164	Association Between Medications and Increased Fall Risk Among Older Adults: Implications for Medication Management and Fall Prevention Interventions	3	1.30pm
265	Polypharmacy And Potentially Inappropriate Medication Prescriptions In Older Nursing Home Residents Presenting To The Emergency Department.	3	1.30pm
182	Pharmacists,Äô Opinions on Deprescribing Fall Risk Increasing Drugs in Older People	3	1.30pm
104	Oxygen Prescription On A Specialist Geriatric Ward	4	1.30pm
108	Accuracy of Medication Prescriptions at Transitions of Care: An Avoidable Patient Risk	4	1.30pm
280	Prevalence of prescribing high Anticholinergic scoring medications amongst over 65-year-old patients in Primary Care.	4	1.30pm
284	Electronic Prescribing In A Rehabilitation Hospital for Older Persons - Our Experience To Date	4	1.30pm
16	Drug Prescribing in Older Patients with Reduced Kidney Function - How Do We Fair?	4	1.30pm

335	A Service Evaluation of a New Dedicated Clinic for Older Adults Living with HIV; The Platinum Clinic	4	1.30pm
238	An Age Related Acute Medical Unit - Creating an Age-Attuned Model of Acute Care.	4	1.30pm
272	Advanced Nurse Practitioner - Supported Nursing home liaison Service	4	1.30pm
132	Stakeholders experiences of comprehensive geriatric assessment in an inpatient hospital setting: a qualitative systematic review and meta-ethnography	4	1.30pm
148	Urinary Incontinence: A Hospital Inpatient Point Prevalence Study	4	1.30pm
283	An Online Portal To Monitor Trends Of Patients Clinically Deteriorating Or Requiring Transfer From A Rehabilitation Hospital For Older Persons	4	1.30pm
3	Defining Loneliness for Older Adults: A Multi-study Synthesis.	5	1.30pm
27	An evaluation of Suicidality of those over 65 years referred to Liaison Psychiatry in the acute hospital setting.	5	1.30pm
173	The Development And Early Experience Of A Multidisciplinary Acute In-Patient Frailty Team	5	1.30pm
36	A Comparison of the MNA® and MUST Tools for Nutritional Screening of Older Patients in a Day Hospital Setting	5	1.30pm
88	An Audit Of The Quality of Documentation During The End Of Life Phase Of Older Adults In Acute Hospital Settings	5	1.30pm
328	From Delirium Detection to Correction: Enhancing Peri-Operative Care for Older Patients	5	1.30pm
190	Catheterisation and Its Effects: Observations from an Acute Hospital Point Prevalence Study	5	1.30pm
222	Incontinence Acquired during Hospitalisation: Targets for Improving Standards of Care	5	1.30pm
107	Communication Deficits at Transitions of Care	5	1.30pm
82	Needs Of Stroke Survivors After Acute Stroke And Early Supported Discharge (ESD), At Hospital Discharge, And At 3- And 6-Months.	5	1.30pm
332	Gut Reaction: Faecal Microbiota Transplantation in a Multimorbid Older Patient with Recurrent C. difficile Infections	6	1.30pm
9	Impact Of Finding Incidentalomas In Neuro-imaging In Patients With Acute Stroke- A Retrospective Review	6	1.30pm
86	Meitheal Programme (MP) Phase 2 Supporting the Needs of Nursing Home Staff Delivering Palliative Care (PC) to the Older Person	6	1.30pm
263	Improving Nutritional Care for Older Adults with Hip Fractures: Insights from a Multidisciplinary Quality Improvement Workshop	6	1.30pm
60	Surgical Inpatient Delirium: A Re-audit of the Documentation of the 4AT Score	6	1.30pm

240	Reviewing Time-to-Surgery For Acute Hip Fractures In Older Adults To Develop ,ÄòSipTilSend,Äò Policies	6	1.30pm
116	Shared Decision Making (SDM): Implementation And Evaluation In Our Perioperative Care Of Older People Undergoing (POPS) Service	6	1.30pm
67	Audit Of Discharge Summaries On A Geriatric Ward Against The Health Information and Quality Authority (HIQA) National Standard	6	1.30pm
324	Statin Prescribing in Ischaemic Stroke Patients: Quality Improvement of an Acute Stroke Ward in a Model 4 Tertiary Teaching Hospital	6	1.30pm
50	Employing Shared Decision Making (SDM) to reduce NSAID related harm and hospitalisations, in at-risk patients in primary care.	7	1.30pm
76	Improving Medicines Management Of Inpatient Parkinson,Äòs Disease Patients By Making Pharmacy Interventions	7	1.30pm
95	Do Not Attempt Resuscitation: All or Nothing?	7	1.30pm
244	Delays in DXAs: An audit on the ordering of DXA scans for fragility fractures in a Level 3 University Hospital	7	1.30pm
308	The Development of a Competency Toolkit for Nurses Working in Stroke in the Irish Healthcare Setting	7	1.30pm
140	Introduction Of A Post Fall Medical Review Pro Forma For Hospital Inpatients	7	1.30pm
285	,ÄòTo Communicate Or Not, That Is Not The Question!,Äò	7	1.30pm
236	Assessing Communication of Duration of Dual Antiplatelet Therapy on Discharge Letters: An Acute Stroke Unit Audit	7	1.30pm
8	A Prospective Audit on Outpatient Clinical Activity in a Consultant-led General Medical and Specialist Geriatric Clinic	7	1.30pm
30	An Irish Multi-Hospital Longitudinal Study Of Discharged Patients With A Diagnosis Of Dementia	7	1.30pm
175	Navigating The Transient Ischaemic Attack Pathway ,Äî Unveiling The Gaps And Developing A Standard Solution	8	1.30pm
277	Audit of intentional rounds to measure compliance and explore patient feedback in a rehabilitation hospital for older adults.	8	1.30pm
349	From The Voice Of Experience: Listening To Older Adults To Co-Design A New Frailty Service In The Emergency Department	8	1.30pm
69	"The Model Ward": A Stroke And Specialist Gerontology Ward In A Level Three Hospital In Ireland	8	1.30pm
131	A Review Of The Implementation Of A Specialist Older Persons 7 Day Service Within An Acute Setting	8	1.30pm
126	Rhythmic Connections: A Pilot Interdisciplinary Music Therapy Group Programme for People with Parkinson,Äòs in a Day Hospital	8	1.30pm

194	Weekend Warrior: a Structured Self-Directed Physiotherapy Exercise Programme that Enhances Weekend Exercise in Older Persons Inpatient Rehabilitation	8	1.30pm
297	Assessing Continence Care in a Rehabilitation Unit: Insights from an Audit	8	1.30pm
137	Harnessing Technology to Augment Comprehensive Geriatric Assessment for Older Adults with Frailty in CRISP Admissions	8	1.30pm
24	Benefit Of Therapeutic Oral Trials In Dysphagia Rehabilitation	8	1.30pm
80	Before you go': Ensuring Thickener is Prescribed on Discharge	9	1.30pm
304	Increasing the Intensity of Physiotherapy in a Subacute Stroke Rehabilitation Unit - Results of Audit and Intervention	9	1.30pm
152	Case Study: The Use Of Talking Mats To Facilitate Assisted Decision Making In Hospital Settings With Older Adults	9	1.30pm
68	The Recovery of Mobility Post Hip Fracture as Measured by the New Mobility Score and Patient Perception	9	1.30pm
155	Review of the Physiotherapy Needs of Hip Fracture Patients Post Discharge from offsite Rehabilitation	9	1.30pm
156	Capturing Older Adults' Rehabilitation Needs and Complexity in a Rehabilitation Hospital	9	1.30pm
165	Improving Sarcopenia With A Physiotherapy-Dietetics Sarcopenia Management Pathway In A Post-Acute Rehabilitation Unit	9	1.30pm
59	The Effectiveness of a Progressive Resistance Exercise Class for Sarcopenic Hospitalised Older Adults	9	1.30pm
18	Early Supported Discharge for Older Adults Admitted to Hospital with Medical Complaints: A Qualitative Study Exploring the Views of Stakeholders	9	1.30pm
79	Aiming to be Champions: Stroke Swallow Screen Audit	9	1.30pm
